1st step → reverse total array

↳ what it will do → it will generally reverse
the total array

↳ How it will be done :—

using reverse (numbers.begin(),
nums.end()))

↙ intial

| 1 | 2 | 3 | 4 | 5 |

↙ finally

| 5 | 4 | 3 | 2 | 1 |

↳ now reversing ↙ from start to k-1th element

k = 2

| 4 | 5 | 3 | 2 | 1 |

now for making it cyclic reverse n+k to end //

| 4 | 5 | 1 | 2 | 3 |
